# CAT Full CAIS Open Issues List – As of 7/5/2022

## Release Planned/Workaround Provided

| # | Status         | Error Code | Summary                                                                                                                                                                                                                                                                                                                                                                             | Resolution   | Priority | Test Environment<br>Targeted Release Date/Workaround | Production Environment<br>Targeted Release Date/Workaround | Area Affected                |
|---|----------------|------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|------------------------------------------------------|------------------------------------------------------------|------------------------------|
| 1 | Open           | 22041      | Instances of CAIS Data feedback containing 22041 errors when the <i>customerRecordID</i> is present in the file on either a Natural Person or Legal Entity customer record, and the same <i>customerRecordID</i> has a malformed TID warning in the CAIS TIDS feedback. A 22048 error is expected instead of the 22041 error.                                                       | Code Release | Medium   | Fix: 7/31/2022                                       | Fix: 8/8/2022                                              | Data Validation              |
| 2 | Open           | N/A        | Intermittent instances where not all TIDs feedback file versions are being generated for a submission. Final feedback is provided including all status transitions, however one or more feedback file versions are missing.                                                                                                                                                         | Code Release | Medium   | Fix: 7/31/2022                                       | Fix: 8/8/2022                                              | Data Validation              |
| 3 | Updated – Open | N/A        | Counts of customer records received and successful in the CAIS Data Feedback file are reconciled to a count of unique TIDs, rather than the count of <i>customerRecordID</i> values in the file. This also occurs for the count of Customer records Processed, Accepted, and Rejected displayed within the CAIS Reporter Portal on the Completed Submissions and Submission Report. | Code Release | High     | Fix: 7/31/2022                                       | Fix: 8/8/2022                                              | Feedback and Reporter Portal |

| # | Status    | Summary                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Publish Date | Spec Version | Effective Date - Test | Effective Date - Prod |
|---|-----------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|--------------|-----------------------|-----------------------|
| 1 | Published | Add a new <i>fdidEndReason</i> value of 'INACTIVE' as option to end FDIDs that have had no CAT-reportable activity events (e.g., MENO, MEOR, MEOT, etc.) associated with the Account in the prior six months. For the purposes of periodic refresh requirements, monthly refresh report excludes any FDID with an <i>fdidEndReason</i> of 'INACTIVE' populated and an <i>fdidEndDate</i> set on or before the date of the report.                       | 3/9/2022     | 2.0r7        | TBD                   | TBD                   |
| 2 | Open      | Update the description of Error Code 22523 – Customer Record rejected because an associated FDID was rejected – to include that the Error Code is also returned in the event the Customer Record is not associated to at least one FDID within the submission file.                                                                                                                                                                                     | TBD          | 2.0r10       | N/A                   | N/A                   |
| 3 | Open      | Update the October 11, 2022 date in the description of the role value of 'AUTH3RD' to be consistent with revised FAQ T7. Specifically, Prior to January 16, 2023, this role may be used when the Industry Member itself has authority to place orders for the Account without prior approval of the account holder(s) and is not the holder of the account. Effective January 16, 2023, the role for the Industry Member must be reported as 'AUTHREP'. | TBD          | 2.0 r10      | N/A                   | N/A                   |
| 4 | Open      | Clarify the description of the customerType value of 'RIC' - Customer is a Registered Investment Company, as defined in the Investment Company Act of 1940 (15 U.S.C. § 80a–3(a)(1)), if maintained in the Industry Member's general customer and account records.                                                                                                                                                                                      | TBD          | 2.0 r10      | N/A                   | N/A                   |
| 5 | Open      | Update the definition of the sentinel file for the Nightly Inconsistencies scans to remove the .bz2 compression. The sentinel file does not contain any significant data and does not require the compression.                                                                                                                                                                                                                                          | TBD          | 2.0r10       | N/A                   | N/A                   |
| 6 | Open      | Clarify that a total of 100 Customer Records can currently be associated with an FDID Record. Create additional Error Code for more granularity on this validation, currently feedback provided under Error Code 23999 (Unhandled Exception).                                                                                                                                                                                                           | TBD          | 2.0r10       | N/A                   | N/A                   |
| 7 | Open      | Update the Table 17 and Table 18 entries for the file status of COMPLETED_FILE_TIMEOUT to include the status is also returned in the CAIS Data Feedback or TIDS Feedback files in the event the paired file is received but reaches a COMPLETED_INTEGRITY_ERROR state.                                                                                                                                                                                  | TBD          | 2.0r10       | N/A                   | N/A                   |

# CAT CAIS LTID Recently Closed Issues List – As of 7/5/2022

| # | Status | Error Code | Issue Summary                                                                                                                                                                                                                                                                                                                    | Resolution   | Priority | Test Environment Release Date  | Production Environment Release Date | Area Affected                  |
|---|--------|------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|----------|--------------------------------|-------------------------------------|--------------------------------|
| 1 | Closed | N/A        | Instances of an LTID Phase submission file not completing processing and remaining in a RECORD_SCAN_COMPLETED as a result of an error in the handling of the Submission ID. The feedback file available on the SFTP will contain any identified rejections, however the final transition to the Completed state is not received. | Code Release | High     | <b>Fix:</b> Deployed 6/8       | <b>Fix:</b> Deployed 7/1/2022       | Data Validation                |
| 2 | Closed | N/A        | Some rejection repairs are not properly reflected in the Submission Report information. This also impacts statistics in the monthly Report Card.                                                                                                                                                                                 | Code Release | High     | <b>Fix:</b> Deployed 6/26/2022 | <b>Fix:</b> Deployed 7/1/2022       | Data Validation & Report Cards |
